

ProBM HIGH SPEED PLANETARY BALL MILL

ProBM series planetary ball mill is an essential device for mixing, fine grinding, sample preparation, nano-materials dispersion, new product development and small batch production of high-tech materials. With small size, full-feature, high efficiency and low noise, this product is an ideal instrument for scientific research institutions, higher institutes and corporate research laboratories to obtain the micro-particle samples (four samples can be obtained in one experiment). If equipped with vacuum ball milling cans, it can grind the samples under vacuum situation.

Model	ProBM04L	ProBM2L
Capacity	100ml×4	500ml×4
Vacuum Jar	Customized	250ml×4
Display	4" color touch screen	
Programming	10 programs	
Operation	2 or 4 jars	
Max. Feeding	2/3 capacity of jars	
Feeding Granularity	soil≤10mm other≤3mm	
Discharging Granularity	0.1μm	
Max. Operation time	72h	
Max. Rotation Speed	800r/min	650r/min
Power	750W	750W
Weight	70KG	96KG
